DAWID FIRMOWSKI

PYTHON DEVELOPER

Open-minded and highly motivated developer with a strong passion for continuous growth and a particular focus on expanding knowledge in the IT field. Diligent and hardworking, consistently goes above and beyond to achieve goals and exceed expectations. Possesses exceptional interpersonal skills and a natural ability to collaborate effectively with diverse teams, as well as excellent at working independently.

PROJECTS

FOOTBALL PLATFORM

ONLINE | *GitHub*

Description:

A user-friendly football platform facilitating the seamless addition of league matches and enabling effortless access to match detail and team information.

Tech Stack:

Python, Django, HTML & CSS, PostgreSQL, Azure

Challenge:

Creating a form that filters the teams accordingly, assigns points to the winning team, asks for goal scorers and checks the entered data.

EXPERIENCE

INTERN

PORSCHE INTERAUTO | *Warsaw* | 09.2021 – 02.2023

Description:

As an intern at an Audi/Porsche/Volkswagen dealership, I gained valuable experience working at the intersection of technology and the automotive industry. As a team member, I expanded my teamwork skills by collaborating with multiple departments and small groups. I optimized time and work efficiency for my co-workers, developed technical expertise, enhanced problem-solving abilities, and gained hands-on experience in a customer-centric environment.

Challenges:

Working and cooperating with multiple departments, meeting customers' requirements and working under pressure of time.

Duties:

- Working and cooperating with multiple departments (teamwork, problem-solving abilities)
- Managing time to effectively work with a team as well as independently (time management, teamwork, independent work)
- Working with cloud programs and cars related software

- Thorough knowledge of the construction and operation of the car and its systems (ability to read documentation, self-development, ongoing learning)
- Constant cooperation with insurance companies and meeting customers; requirements (work with customers, work under pressure of time)

COURSES

PYTHON DEVELOPER

*Python/JavaScript/HTML & CSS/Django/PostgreSQL/Scrum
Warsaw / 03-2023 – 06.2023*

Advanced Python course led by developers who has many years of experience. Course took ~500 hours in total with additional projects, workshops and tasks between courses sessions. Comprehensive and intensive training program designed to equip aspiring developers with advanced skills and knowledge in the field of Python development. The idea of this course was to learn Python and Django framework alongside with PostgreSQL database. The course placed a strong emphasis on testing and debugging, teaching how to write effective unit tests. Additionally the course included basics of Linux, Git and HTML & CSS. Moreover, during the course I have also obtained knowledge of JavaScript (OOP, DOM). The course was a great blend of theory and practice with real-life scenarios on working as a Python developer.

EDUCATION

Warsaw University of Technology

Warsaw / 2018 – 2022

Bachelor of Engineering: Electrical Engineering
